PRIMARY ROUTE OF EXPOSURE: Inhalation

SIGNS & SYMPTOMS OF EXPOSURE

EYES: May cause irritation to the eyes.

SKIN: May cause irritation to the skin.

INGESTION: N/A

INHALATION: Inhalation of high vapor concentrations of 141-B and Freon 22 can cause dizziness, unconsciousness, difficulty in breathing, and death due to asphyxiation. Rapid or irregular heartbeat with abnormally low blood pressure may occur. High vapor concentrations of pentanes may cause dizziness, headaches, anesthesia, drowsiness, unconsciousness, and other central nervous system effects, including death.

ACUTE HEALTH HAZARDS: The dust produced by reprocessing of this product may aggravate pre-existing respiratory diseases. Persons with a known history of heart disease or irregularities of heart beat should avoid breathing vapors that may be released from product containing 141-B and Freon 22 during reprocessing or altering of this product.

CHRONIC HEALTH HAZARDS: The 141-B and Freon 22 that may be used in this product may cause the heart to become sensitized to epinephrine and to stop on sudden physical exertion or excitement. May cause respiratory sensitization.
This product may contain tris (monochloropropyl) phosphate, which may cause skin sensitization.

CARCINOGENICITY: Direct implantation of glass fibers into the lung tissue of laboratory animals has produced lung fibrosis and lung cancer. Human epidemiological studies of inhalation exposure have yielded negative results. NTP Listed; Carcinogen IARC Class 3.
