SECTION 4: FIRST AID MEASURES**FIRST AID PROCEDURES**

- EYES:** Flush with warm water for 15 minutes and seek immediate medical attention.
- SKIN:** Wash with soap and water for 15 minutes. If irritation persists, contact a physician.
- INHALATION:** Move victim to fresh air. If breathing has stopped, give artificial respiration. Seek immediate medical attention.
- INGESTION:** Do not induce vomiting. Get medical attention and advise the physician of the nature of the material.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS: N/A

SECTION 5: FIRE FIGHTING PROCEDURES

- SUITABLE EXTINGUISHING MEDIA:** Foam, water spray (fog), carbon dioxide, dry chemical, and vaporizing liquid type extinguishing agents may all be suitable for extinguishing fires involving this product. Water may be ineffective, but should be used to keep fire-exposed containers

cool. If a leak or spill has ignited, use water to disperse the vapors and to protect workers attempting to stop a leak. Water spray may be used to flush spills away from exposures.

HAZARDOUS COMBUSTION PRODUCTS: Carbon dioxide, carbon monoxide, aldehydes, acrid smoke and irritating fumes.

RECOMMENDED FIRE FIGHTING PROCEDURES: Wear impermeable protective clothing and self-contained breathing apparatus. Toxic fumes and vapors may be evolved. Minimize the breathing of gases, vapors, fumes or decomposition products. Use supplied-air breathing equipment for enclosed or confined spaces or as otherwise needed.

UNUSUAL FIRE & EXPLOSION HAZARDS: Extremely flammable. Vapors may ignite and/or cause flash fires. No smoking. Eliminate sources of ignition. Use adequate cross-ventilation sufficient to remove odor of solvent and vapors. Electrically ground all containers during transfer. This product is volatile and gives off invisible vapors. Either the liquid or vapor may settle in low areas or travel some distance along the ground or surface to ignition sources where they may ignite or explode.

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: Eliminate all ignition sources (flames, hot surfaces and sources of electrical, static or frictional sparks). Dike and contain spill with inert material (e.g. sand, earth). Transfer liquids to covered metal containers for recovery or disposal, or remove with inert absorbent. Use only non-sparking tools. Place absorbent diking materials in covered metal containers for disposal. Prevent contamination of sewers, streams and groundwater with spilled material or used absorbent.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Keep container closed when not in use. Store at 60 – 95 °F and out of the sun. Use adequate ventilation to avoid breathing vapors when cover is removed. Ground all equipment when handling flammable solvent borne materials.

OTHER PRECAUTIONS: For professional or industrial use only. Follow label instructions. Keep out of the reach of children. Not for consumption. No smoking. Do not breathe fumes. Avoid contact with body. Turn off all pilot lights, flames, stoves, heaters, electric motors, welding equipment and other sources of ignition. Close all containers when not in use. Contact lens wearers take appropriate precautions. Wash hands thoroughly after handling. For spray applications, use only with approved spray equipment. For flammable products, vapors may cause flash fire or ignite

explosively. To prevent buildup of vapors, use adequate ventilations (e.g. open all windows and doors to achieve cross-ventilation). Containers may be hazardous when empty. Never use welding or cutting torch on or near container.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS / VENTILATION:

Use with ventilation sufficient to prevent exceeding recommended exposure limits or build up of explosive concentrations of vapor in air.

RESPIRATORY PROTECTION:

If personal exposure concentrations cannot be maintained below the appropriate exposure limits using engineering controls, a NIOSH/MSHA approved organic vapor air purifying respirator may be appropriate based on employer-determined exposure levels. Air supplied or SCBA respirators may be required when the measured chemical concentration exceeds the capacity of the air purifying respirator or when personal exposure levels are unknown.

EYE PROTECTION:

Safety glasses with side shields are recommended when pouring or applying this product.

SKIN PROTECTION:

Wear chemical resistant gloves when handling this product to avoid prolonged skin contact.

OTHER PROTECTIVE EQUIPMENT:

Barrier cream for sensitive skin.

WORK HYGIENIC PRACTICES:

Wash exposed skin prior to eating, drinking or smoking and at the end of each shift. Wash contaminated clothing prior to reuse.
