# MINERAL GUARD™

## RESIDENTIAL ROLL ROOFING

### Description

Mineral Guard™ Residential Roll Roofing is great for use on low-sloped roofs over porches, garages, car ports, sheds, and other residential structures. Its fiberglass-reinforced construction helps the product resist moisture absorption, lie flatter, and reduce weathering. Mineral Guard™ Residential Roll Roofing should only be used on roofs having positive drainage and slopes of no less than 2:12. Do not use on roofs where water can collect.

For complete installation details, see the Mineral Guard™ Residential Roll Roofing wrapper or call GAF Technical Services at 1-800-ROOF-411. For limited warranty, visit [gaf.com](http://gaf.com).

### Advantages

- Easy to Install – Perfect for small residential projects
- Fiberglass-Reinforced – Helps resist moisture absorption
- Lies Flat – For great looks
- Available in charcoal, white, and a variety of other colors.

### Applicable Standards

Miami-Dade County Approved\*  
 ASTM D3909\*  
 UL Approved for use in the construction of Class C roof systems

\*Savannah plant only
