## Cobra® Nail Gun Adapter Installation Instructions

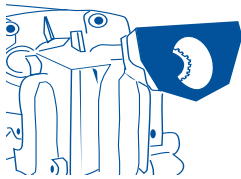

### 1. Disconnect...

air supply line, wipe any loose dirt off base of air nailer.

### 2. Remove And Align...

remove the release film from the Cobra® Adapter. Align adapter so that the nail hole is inside the slot of the adapter and press firmly.

### 3. Insert...

the coil of 1 $\frac{3}{4}$ " roofing nails. Reconnect the air supply line to the gun.

### Important...

To prevent personal injury from fasteners or flying debris, **ALWAYS** disconnect the air supply line from the roof nailer before installing the adapter to its base.

## SAFETY WARNING

- To prevent eye injury, all operators and workers in the general area should wear approved safety glasses.
- To prevent personal injury from fasteners or flying debris, always disconnect the air supply line from the roof nailer before installing the adapter to its base.
- **NEVER** attempt to install or remove the adapter when the air supply line is connected to the air nailer.
- **ALWAYS** disconnect air supply line before clearing a jam, replacing nail coils, servicing and when nailer is not in use.
- Do not modify or tamper with safety locks and triggers, which should always be maintained in good working order.
