

Seamless, leak-free spray foam roof protection from GAF

Advanced spray polyurethane foam (SPF), coated with either GAF High Solids Silicone or GAF Diathon® Acrylic coating, creates a roofing system engineered to restore, protect, and extend the life of your roof.

Renewable and lightweight, seamless and self-flashing, a coated SPF roof may offer a smart alternative to a full roof tear-off. This potentially energy-saving technology offers an R-value equal to or better than polyiso (approx. 6.1 to 7.0) for improved building efficiency and occupant comfort.*

Top coat with either GAF High Solids Silicone or GAF Diathon® Acrylic for a high-performance, leak-free roofing system, with high wind-uplift and hail resistance ratings, may qualify for the full-system GAF Liquid-Applied Emerald Pledge™ Limited Warranty or Diamond Pledge™ NDL Roof Guarantee. Talk to your GAF TSR for details.

Which coating is right for your project?

	GAF High Solids Silicone Coating	GAF Diathon® Roof Coating
Stands up to ponding water	✓	
Low VOC	✓	✓
Available in highly reflective white*	✓	✓
Available in a variety of highly reflective colors to help save on cooling costs*		✓
Seamless protection	✓	✓
Easy to apply	✓	✓

Why a coated SPF Roof?

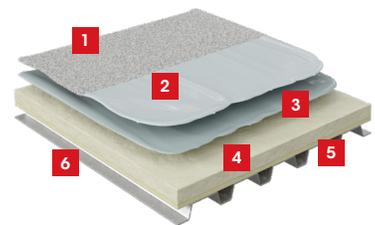

- Suitable over most roofing substrates
- Requires minimal tear-off for retrofit projects
- Conforms easily to irregular shapes and slopes
- Serves as a vapor barrier
- Liquid-applied, creates a monolithic membrane
- Can help increase structural strength
- Can help reduce necessary maintenance

* Energy cost savings are not guaranteed and the amount of savings may vary based on climate zone, utility rates, radiative properties of roofing products, insulation levels, HVAC equipment efficiency, and other factors.
