

Roofing designed to last

The HydroStop® System Advantage:

Versatile. Effective. Reflective.*

For new roof, recover, and reroof applications, count on the full-fabric GAF Premium Acrylic HydroStop® Liquid-Applied Roof System for a versatile, easy-to-apply combination of reinforcement and toughness.

- A 30-year record of proven performance in the field
- Custom-fit solution is monolithic, seamless, and self-flashing
- Built on-site to fit unique building conditions
- Available in solar-reflective colors
- Can contribute toward LEED® points
- Very low VOC means no building closure required
- Exceptional UV and water resistance
- Recoatable on structurally sound roofs with simple maintenance
- Ideal for roofs with many penetrations that would be labor intensive with common single-ply installations

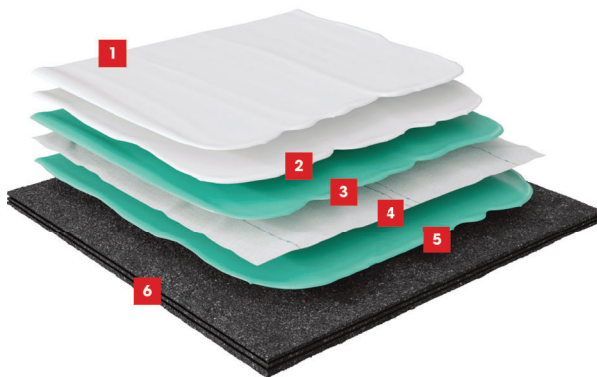

Use on most common low-pitched roof substrates:

- Metal (historic or commercial)
- BUR**
- Aged TPO
- EPDM
- Gypsum board
- Structural concrete
- Modified bitumen**
- Aged PVC
- Polyiso

*Select colors only. Contact GAF for more information.

**New asphaltic membranes should be aged at least 30 days.

The GAF Premium Acrylic HydroStop® Roof System

1	GAF Premium Acrylic HydroStop® Top Coat
2	GAF Premium Acrylic HydroStop® Top Coat
3	GAF Premium Acrylic HydroStop® Base Coat
4	GAF Premium Fabric
5	GAF Premium Acrylic HydroStop® Base Coat
6	Existing Built-Up Roof

GAF Premium Acrylic HydroStop® Top Coat

The finish coat of the GAF Premium Acrylic HydroStop® Roof System is a water-based acrylic top coat that provides UV resistance and has low VOCs. It is available in multiple colors; customized tinting is also available.

GAF Premium Acrylic HydroStop® Base Coat

HydroStop® Base Coat is a water-based acrylic coating that is tinted green to help installers easily spot substrate not yet covered.

GAF Premium Fabric

This tough, non-woven, stitch-bonded heat-set polyester designed for a variety of roofing and flashing applications acts to reinforce and strengthen your liquid-applied roofing system.

The alternative to metal retrofitting: Liquid restoration

For a cost-effective, long-term, easy-to-apply coating solution for restoration of structurally sound metal roofs, choose GAF Premium Acrylic HydroStop® Top Coat.

Approvals for Premium Acrylic HydroStop® Base Coat and Premium Acrylic HydroStop® Top Coat

- Classified by UL in accordance with ANSI/UL 790*
- FM Approved per Approval Standard 4470, including as components of Class 1-SH rated assemblies**
- State of Florida Approved (FBC) FL620, FL20663
- Miami-Dade County Product Control Approved
- White (for all substrates) and Light Tan (for smooth substrates only) rated by the Cool Roof Rating Council (CRRC) for use in Title 24 Projects

*Refer to UL Product iQ for actual assemblies

**Refer to RoofNav.com for approved assemblies

Solar compatibility

The GAF HydroStop® System is an ideal solution for solar roof installations that require the underlying membrane to conform to penetrations.

HydroStop® System Spotlight:

Texas A&M University, College Station, TX

The Texas A&M University Corps of Cadets is one of the nation's largest uniformed student bodies. Approximately 2,000 of those students live in 11 dormitories on the A&M quad, nine of which date back to the 1930s. Absolute Roofing & Waterproofing, a GAF Coatings Certified™ Contractor, chose the HydroStop® System for both the reroofs and the two new roofs. Installing a preliminary HydroStop® Base Coat on the entire 1,000 square project created a walkable surface that allowed the huge crew to efficiently complete other preparation tasks. Two coats of HydroStop® Top Coat finished the historic restoration.
