

# The sealant you'll always want on hand

RepairPro Trowel-Grade Sealant is a solvent-based, synthetic, elastomeric product that can be applied in wet conditions, making it ideal for emergency repairs. It is flexible, durable, and can be used on a variety of substrates, and the no-sag formula means it can be used for vertical applications. Available in white.

## Advantages:

- Non-sagging, and reinforced with fibers for added tensile strength.
- VOC-compliant throughout North America
- No primer needed over most substrates.\*
- UV Stable — does not require a top coat.

\* Not for use over silicone substrates. See [gaf.com](http://gaf.com) for more information.  
† Standing water should be removed. Metal surfaces must be dry. See product packaging for more details.

Shown: 1 gal. pail

## Emergency Repairs:

RepairPro can be applied to most damp surfaces to help stop leaks immediately.†

RepairPro forms a flexible, durable seal and is easily applied in one step. GAF Premium Fabric may be used for extra reinforcement on penetrations, flashings, and seams.

## Maintenance Applications:

Multi-purpose sealant in convenient packaging makes RepairPro an ideal go-to product for roofers and maintenance/service teams.

Available in 1 gal. and 3 gal. packaging sizes.
