

GAF RoofCoatings

We're building success into every detail

Pros know that coating success depends on the details. GAF Coatings focuses on the details, too — from the silicone, acrylic, and urethane coatings you need all under one roof, to hands-on and on-demand GAF CARE training, and a team dedicated to supporting and growing your coatings business.

We protect what matters most™

GAF

We provide training around **your** crew's needs

Choosing the right coating is just the start. Make sure your crew has the skills and labor-saving techniques they need to get the job done right. Connect with your local GAF Coatings rep, who can answer your most pressing questions, and register for live demos or on-site, on-demand, or remote training in all of our coatings solutions.

GAF RepairPro: The sealant you'll always want on hand

GAF RepairPro Trowel-Grade Sealant is flexible, durable, and UV stable, and can be used in a wide variety of applications.

- **Emergency Repairs:** Can be applied to most damp surfaces to stop leaks immediately^{1,2}
- **Maintenance Applications:** Multi-purpose sealant in convenient packaging makes RepairPro an ideal go-to product for roofers and maintenance/service teams

RepairPro forms a flexible, durable seal and is easily applied in one step.

Advantages:

- Professional flashing grade
- Can be used without fabric. No mixing!
- No primer needed over most substrates
- UV stable — does not require a top coat

¹ Standing water should be removed. Metal surfaces must be dry. See product packaging for more details.

² Not for use on silicone-coated roofs.

For new roofs, recovers, and reroofs, choose the

GAF Premium Acrylic HydroStop® Liquid Membrane System

For recover, reroof, and new roof applications, count on the **GAF Premium Acrylic HydroStop® System**. This versatile and easy-to-apply FM 4470 (SH)-rated roof system offers excellent adhesion to a variety of substrates, including new and existing metal, structural concrete, TPO, PVC, Hypalon®, EPDM, polyiso, gypsum roof board, and asphaltic roofs¹. A model of sustainable design, this full-fabric assembly can be recoated and renewed, with proper maintenance on structurally sound roofs, for years to come.

¹ New TPO and asphaltic roofs should be weathered for at least 30 days.

Products to purchase:

GAF Premium Acrylic HydroStop® Top Coat		<ul style="list-style-type: none">A professional-grade, water-based, acrylic elastomeric coating that is part of the GAF Premium Acrylic HydroStop® Coating System
GAF Premium Acrylic HydroStop® Base Coat		<ul style="list-style-type: none">A water-based acrylic base coatUsed in conjunction with Premium Acrylic HydroStop® Top Coat and GAF Premium Fabric, it creates the GAF Premium Acrylic HydroStop® System
GAF Premium Fabric		<ul style="list-style-type: none">A 100% polyester reinforcementEasily conforms around penetrations and improves strength while maintaining flexibility

Premium Acrylic HydroStop® Liquid Coatings

Restore structurally sound roofs with

GAF Acrylic Protective Coatings

Choose GAF Acrylic Roof Coatings for protection against normal weathering, aging, and UV exposure on roofs that need restoration and extension of life.

- Additional Acrylic Coatings Benefits:**
- Water-based, low-odor formula
 - Renewable and easy to apply
 - Offers protection against harmful UV rays
 - High reflectivity (white only)
 - Helps resist dirt pick-up
 - Substrates** — metal, aged single-ply, smooth and granulated asphaltic, structural concrete, SPF, and previously coated acrylic roofs
 - Rated by the Cool Roof Rating Council (CRRC) for use in Title 24 Projects (white only), FM Approved, UL Classified, and Miami-Dade County Product Control approved¹

¹ Refer to UL Product iQ, FM RoofNav, and Miami-Dade County NOA for actual assemblies.

Acrylic Protective Coatings:

GAF Acrylic Top Coat		<ul style="list-style-type: none">Premium elastomeric acrylic coatingForms a monolithic coating that helps provide protection against damage from exposure to UV and weather elementsAvailable in quick-set formula
GAF High Tensile Acrylic Top Coat		<ul style="list-style-type: none">Features a high-tensile emulsion polymer and reinforcing pigments for durabilityHelps provide protection against damage from exposure to UV and weather elements
GAF WOB Acrylic TopCoat®		<ul style="list-style-type: none">Tested and certified by NSF International in accordance with NSF Protocol P151: Health Effects from Rainwater Catchment System Components (white only)Formulated without the use of biocides
GAF Acrylic Base Coat		<ul style="list-style-type: none">Combine with GAF Acrylic Top Coat or GAF High Tensile Acrylic Top Coat to form an elastomeric, monolithic membrane that helps provide protection against water infiltration, normal weathering, aging, and ultraviolet exposure

Acrylic Protective Coatings

Advanced waterproofing technology with

GAF Silicone Protective Coatings

Tearing off a roof can be expensive and inconvenient. Before you commit to a full reroof, consider adding up to 20 years of useful life to your structurally sound roof, along with excellent protection against leaks due to ponding water, by restoring your roof with GAF High Solids Silicone Coating — a moisture-cure coating that protects against the damaging effects of weather elements and UV rays.

Additional Silicone Protective Coatings Benefits:

- Wide temperature application range
- Easy to apply by spray, roller, or brush
- CRRC Rated (white only), FM Approved, UL Classified, and Miami-Dade County Product Control approved¹
- Substrates** — metal, aged single-ply, smooth and granulated asphaltic, structural concrete, SPF, and previously coated acrylic and silicone roofs

¹ Refer to UL Product iQ, FM RoofNav, and Miami-Dade County NOA for actual assemblies.

Silicone Protective Coatings:

GAF High Solids Silicone Roof Coating		<ul style="list-style-type: none">A high-solids, low-VOC, moisture-cure silicone coatingProvides durable protection against weather elements, UV rays, and leaks due to ponding water for a variety of substratesOne-coat application
GAF Unisil Silicone Roof Coating		<ul style="list-style-type: none">A low-solids, solvent-based silicone coatingProvides durable protection against weather elements, UV rays, and leaks when applied over polyurethane foam insulation and other appropriate substrates
GAF Silicone Mastic		<ul style="list-style-type: none">A thick, brush-grade, high-build silicone sealantEasy-to-use, flexible repair material that adheres to a variety of substrates
GAF Silicone Fibered Sealant		<ul style="list-style-type: none">A fiber-reinforced, high-build, non-sagging vertical grade sealantFor use on penetrations, drains, and any abnormal roof details that require additional reinforcement or toughness

Silicone Protective Coatings

Find the GAF liquid solution for your roof

GAF Coatings is building our liquid-applied roofing line around the needs of your business. Whatever your next project, you can find the high-quality roof coating you need right here.
