

Advanced liquid waterproofing technology from GAF

Protect your roof with confidence — from storms, ponding water, and an array of elements and conditions — with the advanced waterproofing technology of GAF Silicone Protective Roof Coatings.

GAF Silicone gives you more options

GAF Silicone products do more than get the job done. Available in a wide variety of formulas, each contributes to a seamless, durable, UV-resistant, highly reflective white monolithic membrane that protects against leaks due to ponding water — often in only one coat.

- **For reroof, restoration, or repair**, there's a GAF silicone formula that can protect the roof for the long haul.
- **Wide temperature range** means whether you get sub-zero Canadian temperatures or South Florida heat and humidity, silicone will maintain the flexibility and elasticity you count on to protect your roof.
- **GAF Silicone delivers tenacious adhesion to common roofing substrates** including metal, smooth and granulated asphaltic, aged TPO and PVC, structural concrete, SPF, Hypalon®, previously coated roofs, and more.
- **It's GAF so it's guaranteed.** NDL guarantees up to 20 years are available.*

* For qualified systems only. Additional requirements apply. Contact GAF for more information.

We protect what matters most™

GAF High Solids Silicone Roof Coating

This high-solids, low-VOC, moisture-cure silicone coating provides durable protection against weather elements, UV rays, and leaks due to ponding water for a variety of substrates, in one coat.

- **High solids. Zero-solvent formula.** No solvents means lower VOC and reduced overspray, while 97% solids means more product stays on the roof instead of evaporating into the air.
- **Waterproof technology.** Unaffected by ponding water, this silicone won't delaminate.
- **Achieve an ANSI/UL 790 Class A Fire-Resistance Rating** when coating any existing UL Classified Class B or C Rated noncombustible deck roof assembly with GAF High Solids Silicone Roof Coating. Refer to UL Product iQ for full details and requirements.
- **Safety Certified to NSF P151:** Certification of Rainwater Catchment System Components.
- **Maximum bonding** with no primer.*
- **Exceptional whiteness, gloss retention, and reflectivity** thanks to a high-performance titanium oxide (aka TiO₂).
- **Cool roof-rated.** Can be used to comply with the 2025 Title 24, Part 6, Cool Roof Requirements of the California Code of Regulations (white only).
- **24-month** shelf life.
- **Roller or spray** — either way, it stays where you put it.

GAF Unisil Silicone Roof Coating

This solvent-based silicone coating provides durable protection against weather elements, UV rays, and leaks when applied over polyurethane foam insulation and other appropriate substrates.

GAF Silicone Mastic

A thick, brush-grade, high-build silicone sealant, GAF Silicone Mastic is an easy-to-use, flexible repair material that adheres to a variety of substrates. With an elongation of nearly 600%, this mastic is engineered to perform during thermal expansion and contraction.

GAF Silicone Fibered Sealant

This polyethylene fiber-reinforced sealant is formulated to stay where you put it. Non-sagging for overhead and vertical applications, perfect for hard-to-reach details, drains, and scuppers.
