DRILL-TEC™ BATTEN BAR

Description

The Drill-Tec™ Batten Bar is designed to secure single-ply membrane to steel, wood, and structural concrete decks.

Drill-Tec™ Batten Bar is made of heavy-duty Galvalume®. Galvalume® bars have rounded ends and the edges have been deburred. Holes are punched into each bar with standard spacing of 6 in. (152 mm) on center.

Application

For use on steel, wood, and structural concrete decks, and over approved insulations.

Code Approvals

Packaging:

Drill-Tec™ Galvalume® Batten Bars come in 10 ft. (3.05 m) lengths, and are packaged in tubes of 50 (500 ft. [152 m] total). There are 10 tubes/pallet or 5,000 ft [1,524 m].
