StreetBond® DuraShield Pavement Coating

WATER-BASED COATING FOR PARKING LOTS, PLAZAS, AND DRIVEWAYS

StreetBond® DuraShield Pavement Coating is a 100% acrylic polymer formula designed to preserve and protect asphalt pavement surfaces.

Typical asphalt pavement coatings are composed of coal-tar or asphalt emulsion-based formulas, which have a shorter life in high-traffic parking lot areas and produce compounds tracked onto clean surface areas. DuraShield's acrylic polymer formula provides superior wear properties and protects the asphalt from degradation, in addition to providing pavement with a cleaner, professionally finished look. DuraShield is easy to apply and requires no solvents for clean-up, lowering your disposal costs after each job.

Why Coat Asphalt Pavement?

Extends asphalt life, protecting your investment and reducing overall cost of ownership.

Reduces surface friction associated with leaving exposed aggregates in asphalt.

Provides improved traction for pedestrians, cyclists, and drivers than bare asphalt.

Protects asphalt from becoming more brittle as a result of oxidation when exposed to sun, wind, and water.

Why Choose DuraShield Over Typical Asphalt Pavement Coatings?

Superior Durability – Engineered to last longer than typical asphalt coatings.

Fast Installation and Repairs – Quick dry times so you can return the area to service faster.

Simple and Easy Application – Spray (textured sprayer), brush, roll, or squeegee the product onto the substrate.

Protects Against the Elements – Superior protective barrier against UV, water, and chemical damage and other environmental factors.

Safer for the Environment – Water-based formula with low odor that won't track onto adjacent surfaces like coal-tar or asphalt emulsion-based products.

Exceptional Flexibility – Conforms to expansion and contraction of asphalt surfaces, preventing cracking and other accelerated asphalt damage.

Available in:

- 3.5 gallons (13.2 liters) in a 5-gallon pail
- 42 gallons (158.9 liters) in a 55-gallon drum

Colors:

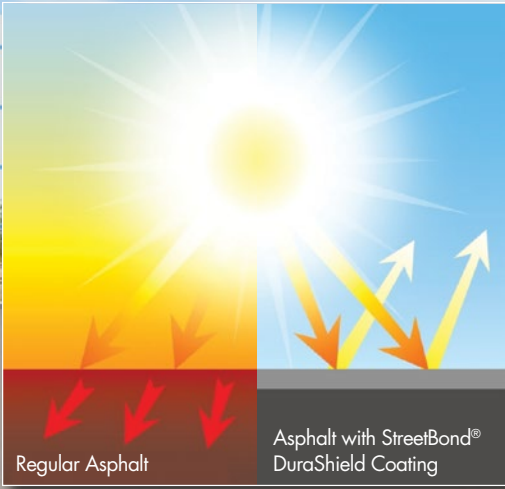

Asphalt

Solar Gray

StreetBond®

Protect and Extend Asphalt Life with StreetBond® DuraShield

- **Excellent Durability**
- **Superior UV Protection and Wet Friction Properties**
- **Easy-to-Apply Water-Based Formula**
- **Low Odor**
