

DRILL-TEC™ 3" DF

STEEL INSULATION PLATES

**Drill-Tec™ 3" DF
Steel Insulation Plate**

Description

Drill-Tec™ 3" DF Steel Insulation Plates are made of Galvalume® coated steel. The round design helps provide an even distribution of loads and eliminates sharp corners that can damage the insulation or membrane, and a flat bottom provides for use on rigid board surfaces.

Drill-Tec™ 3" DF Steel Insulation Plates are used when attaching insulation and cover boards to the substrate with Drill-Tec™ #12 DF Fasteners, Drill-Tec™ #14 DF Fasteners, or Drill-Tec™ #15 DF Fasteners.

Refer to GAF-published application instructions for complete installation requirements. For applications not listed or with questions, please contact Technical Support at 877-423-7663 or technicalquestions@gaf.com.

Product Data

Plate	Application	Diameter	Packaging (Bucket)	Weight
Drill-Tec™ 3" DF Steel Insulation Plate	Insulation	3" (76 mm)	1,000	41 lb. (18.59 kg)

Note: Galvalume® is a registered trademark of BIEC International Inc. and some of its licensed producers.
