

GAF EverGuard® PVC Detail Membrane

Description:

EverGuard® PVC UN-55 Detailing Membrane provides roofing contractors with an easy-to-install factory-built detail, constructed using the EverGuard® PVC KEE formulation. This accessory is used as an alternative material for flashing penetrations and corners of base and curb flashing.

Made with GAF EverGuard® PVC KEE membrane, reliability is built in. Factory-built accessories reduce risk of leaks and callbacks.

Application:

EverGuard® PVC UN-55 Detailing Membrane is designed for use with EverGuard® PVC, EverGuard® PVC XK (KEE) and EverGuard® PVC KEE, and may be installed on EverGuard® PVC 50-, 60-, and 80-mil mechanically attached, adhered, or induction-welded roofing systems.

See published application and specifications manual for detailed instructions.

Product Information:

EverGuard® PVC UN-55 Detailing Membrane comes standard in White, Gray, and Tan. The membrane is unreinforced, so it's easier to work with at difficult flashing details.

UN-55 Detailing Membrane

- Manufactured to strict specifications using GAF high-performance EverGuard® PVC KEE formulation
- Designed for ease of installation
