

EverGuard®
TPO
Drip Edge (Aluminum, Steel)

EverGuard®
PVC
Drip Edge (Aluminum, Steel)

Description:

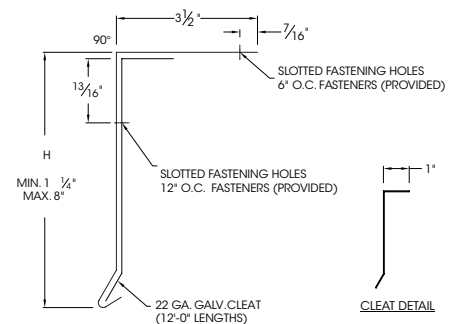

EverGuard® PVC Drip Edge and EverGuard® TPO Drip Edge are specifically designed to simplify the installation process by using an EverGuard®-coated metal cover that you can weld membrane directly to, making installation easier and faster. This ensures compatibility with roof membrane, creates quick-to-ship convenience, and allows for economical pricing—helping you simplify projects and work efficiently.

Features and Benefits:

- The concealed splice-plate design helps prevent water migration under the cover and provides proper spacing for thermal movement of the fascia material.
- Sizes range from 3" (76.2 mm) – 6" (152.4 mm) face heights to accommodate multiple nailers and wall requirements.
- Covers are manufactured in 24 ga. galvanized steel.
- Factory-fabricated miters provide a cleaner, more aesthetically pleasing appearance. This eliminates the need for field fabrication, providing time and labor savings.

Codes and Compliance:

- Evaluated in accordance with ANSI/SPRI ES-1, which is a requirement of IBC Section 1504.5 for roof system metal edge securement.

Product Specifications

Standard sizes	■ 3" (76.2 mm) ■ 4" (101.6 mm) ■ 6" (152.4 mm)
Length	12' (3.65 m)
Materials	24 ga. galvanized steel with PVC or TPO coating
Finishes	White, Gray, Tan
Pre-punched holes	■ Cleat: 12" (305 mm) o.c. ■ Cover: 6" (152 mm) o.c.
