

GAF Kymax®: Durable. Vibrant. As bold as your vision.

GAF Kymax® Coating is a low-build, flexible elastomeric product built for color stability. With an enamel-like finish, Kymax® is ideal for rooftop logos, custom colors, and projects that require high-end aesthetics.

Advantages:

- High color retention
- Ideal for logo work and high-visibility roofs
- Customized colors
- Can be installed over most common roofing substrates

Why GAF Kymax® Coating?

Exceptional color and gloss stability: manufactured using Kynar Aquatec® resin, which is based on proven Kynar 500® technology — a PVDF resin relied on globally for more than 55 years for outstanding durability and color.

It's recommended whenever exceptional weatherability and/or reflectivity are required, whether the threat is scorching sun and temperatures, or where protection against algae, mildew, and dirt pickup is desired.

Iconic impact: The 43,500 square-foot Circus Circus tent roof in Las Vegas, NV was revitalized with a full system of GAF Coatings products, including GAF Kymax® Coating in Exuberant Pink.
