

Sustainability/Social Responsibility Brochure (COMGN264)

Updated: 1/15

*Quality You Can Trust...From
North America's Largest Roofing Manufacturer!™*

SUSTAINABILITY

As responsible stewards for the environment, we are committed to the wise use of resources for today and for future generations.

OUR MISSION STATEMENT

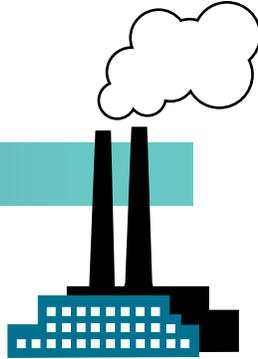

"As a roofing industry leader, GAF is proud to promote sustainability in all areas of our business. We practice and support new technologies in energy efficiency, material

optimization, and recycling that help conserve natural resources, and we share our knowledge to help our contractors, colleagues, and customers do the same."

WE SUPPORT OUR INDUSTRY'S SUSTAINABILITY

MANUFACTURING

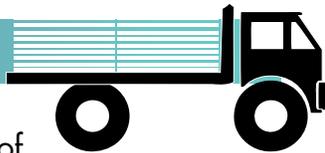

Cool Roofing—GAF has produced more than 2 billion square feet of EverGuard® TPO roofing, a “cool roofing” solution made of polypropylene. Cool roofing reduces energy consumption, which in turn reduces greenhouse gas emissions.

Each GAF facility has a volunteer Green Champion who helps promote sustainability goals and monitor plant performance.

DISTRIBUTION

GAF is a Platinum Sponsor of Certified Green Distributor™, the nation's only training and certifying program for green building material distributors.

CONTRACTORS

The Cool Roof Energy Savings Tool (CREST) at cool.gaf.com helps contractors specify and model projects so that they can estimate energy savings for building owners. The tool has analyzed more than 24 million square feet total in proposed cool roof installations.

ShingleRecycling.org provides information and resources to help contractors recycle more. GAF has developed a mobile shingle recycling finder at recycling.gaf.com.

450 GAF Certified Green Roofers have recycled 1MM tons of roofing products since 2010.

ARCHITECTS

GAF is committed to advancing transparency in building products. We have completed two Life Cycle Assessments, and received two Environmental Product Declarations and four Health Product Declarations. GAF is also proud to have two NSF/ANSI 347 Sustainability Assured plants* as well as three plants that have been third-party certified for Landfill Diversion.

*GAF's EverGuard® TPO products are NSF/ANSI 347 Sustainability Assured
