SELF-ADHERED SBS MODIFIED BITUMEN

Modified bitumen systems provide the features of a BUR system without the need to apply multiple plies to achieve a layered system. Modified bitumen systems are composed of a base sheet and a cap sheet that can be granule or smooth. They were designed to reduce labor requirements for installation and have become increasingly popular over BUR system applications.

Self-adhered SBS modified bitumen systems are designed to provide long-lasting protection for low-slope areas without the danger or hassles associated with the installation of other conventional roofing products. Typically installed as a base sheet/cap sheet system, self-adhered systems can be installed easily and quickly by a small roofing crew without needing bulky equipment or dealing with unpleasant odors. Self-adhered modified bitumen membranes use the same technology as conventional mod bit products, with the added benefit of a strong self-adhering film built-in.

CHOOSING THE RIGHT ASPHALTIC ROOFING SYSTEM

Choosing the right roofing system for an application can be complicated. There are many roof membrane options, and each property may have its own set of unique requirements. So, how do you choose the right roofing system for your property?

**Desired Characteristic**

- Multi-Layered
- Membrane Protection
- Please To Customize To Normal Roof Movement
- Low Maintenance
- Light Reflective for Energy Savings
- Permeable/Leak Resistant
- Easy to Repair After Installation
- Heat Welded, Self Adhered, Tackified, Cold Applied, Or Mopped High Strength
- Grease/Dr/Chemical Resistant
- Can Be Installed in Cold Weather
- High Heat and UV Resistance
- Maximum Guarantee Length in Years?

**Advantages**

- Waterproofing membrane reinforced with a glass mat
- Long-lasting protection for low-slope areas
- Can be applied without torches, open flames, hot asphalt, or messy solvent-based adhesives
- Suitable for plywood decks and many other substrates

**Applicable Standards**

- UL/ULc Listed
- FM Approved
- Miami-Dade County Product Control Approved
- Texas Department of Insurance
- State of Florida Approved
- Meets CGSB-38-GP-56M
- D6164 Type I

**Guarantees**

- System guarantees available for up to 20 years

**Product Specifications**

- Roll Size: 3 squares (216.6 gross sq. ft.)
- Roll Length: 66’ (20.1 m)
- Roll Width: 39.375” (1.0 m)
- Weight: 0.068” (1.73 mm)
- Maximum Guarantee Length in Years: 20
