ACRYLIC COATINGS

ROOFSHIELD[®] I.S.

Fast-Dry Elastomeric Acrylic Coating

Achieve rapid rainwater wash-off resistance and high film thickness with United Coatings[™] RoofShield[®] I.S.

United Coatings[™] Roofshield[®] I.S. Fast-Dry Elastomeric Acrylic Coating is an acrylic polymer dispersion system that is designed to rapidly form a film that resists rainwater wash-off. Because Roofshield[®] I.S. Fast-Dry Elastomeric Acrylic Coating provides high film build, it can be applied in a single coat for fast, efficient installations and maintenance coats.

Features and Benefits

- Designed to rapidly form a film that resists rainwater wash-off in challenging environments
- High surface reflectivity can help reduce building energy consumption
- Can be used in a variety of maintenance coating applications
- Apply a wet film thickness of up to 60 mils (1.5 mm) in a single coat to reduce installed labor cost
- Enables single-coat solution for acrylic coatings

Compatible Substrates

- Granulated BUR
- Granulated SBS
- Granulated APP
- TPO membrane
- PVC membrane
- Structural concrete

Note: For EPDM, SPF, and existing acrylic coatings, contact GAF at 1-800-766-3411.
