DOUBLE-SIDED AND STRIP-IN TAPES

Description

EverGuard[®] TPO single-ply accessories provide roofing contractors with easy-to-install self-adhering details. These tapes are designed for use with Freedom[™] RapidSeam[™] applications, allowing a complete installation without the use of a heat welder.

• Cost effective...

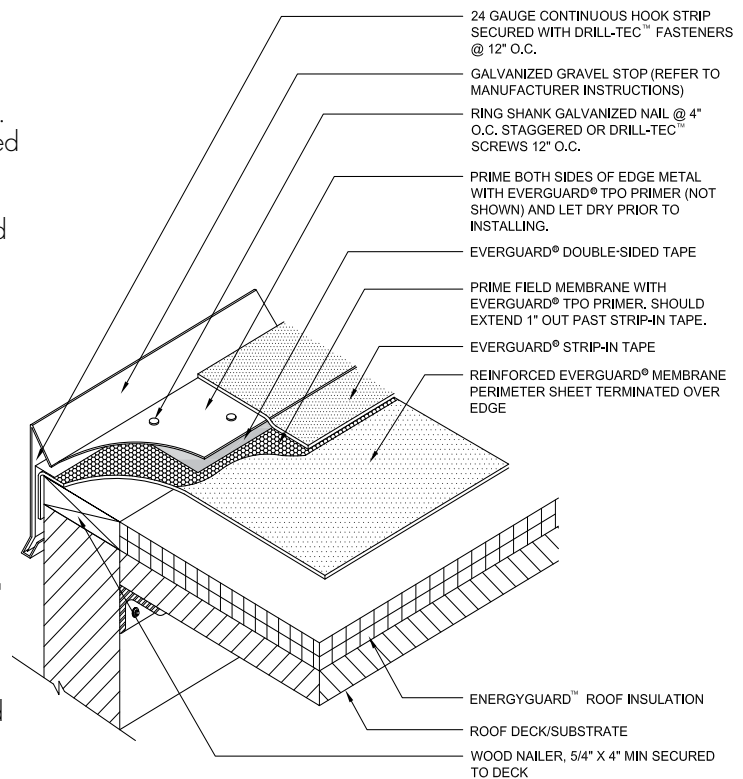

Tape-applied accessories eliminate the time-consuming heat-welding process for virtually all accessory details found on typical Freedom[™] RapidSeam[™] jobs. Application of everything from Preformed Vent Boots to T-joint Patches can be adhered with either Strip-In Tape or a combination of Double-Sided Tape and Strip-In Tape.

• Great aesthetics...

These flexible tapes have an extremely strong adhesive, adhere well to primed surfaces, and lay flat for a low profile appearance.

Application

EverGuard[®] Double-Sided and Strip-In Tapes are designed to secure and seal virtually any standard EverGuard[®] accessory or flashing detail on Freedom[™] RapidSeam[™] installations. Any surface mated to the tapes **MUST** be clean and primed with EverGuard[®] Low VOC TPO Primer. Tapes will not adhere to unprimed areas. Additional details are available at www.gaf.com.

NOTE:

1. BE SURE TO CLEAN METAL AND MEMBRANE WITH EVERGUARD[®] TPO CLEANER BEFORE PRIMING.
2. DO NOT USE ON SLOPES GREATER THAN 1/12. FOR SLOPES GREATER THAN 1/12, REFER TO EVERGUARD[®] DETAIL 218 OR 219.
3. DRAWING IS NOT TO SCALE.

These tapes are also great for temporary repairs. Approved details may be included in EverGuard[®] Freedom[™] RapidSeam[™] TPO guaranteed projects.

Shelf Life: Best if used within one year of manufacture.

EverGuard[®] TPO Double-Sided and Strip-In Tapes
