Airflow Done Right!

NEW DUCTWORK INSTALLATIONS

VENTILATION

HEATING & AIR CONDITIONING
Starting Collars & Take-Offs

This section includes round and rectangular starting collars and take-offs.

Starting Collar Take-Offs – Snap Together
- For transition from lined or unlined plenum to round pipe or insulated flexible duct.
- Snap together.

Starting Collar Take-Offs
- For transition from ductboard plenums, internally lined plenums, or insulated register boxes to round pipe or insulated flexible duct. Can also be used with unlined plenums.
- Extra-long tabs to fit all ductboard thicknesses through 1 1/2” (R6.0 value).

Air-Tite Take-Offs
- Provides transition from flat surface to insulated flexible duct or round pipe.
- Tacky gasket provides excellent seal.

Saddle Air-Tite Take-Off
- Provides transition from round surface to insulated flexible duct or round pipe.
- Tacky gasket provides excellent seal.

Top Take-Offs
- For transition from air plenums or rectangular duct to round pipe or insulated flexible duct.
- RSC is a “Scotch” take-off.
### Flexible Insulated Ducts

**Approval Codes**
- Master IW 181 Class 1 Air Duct
- NFPA 90A or 90B
- International Building Code
- California Bureau Of Home Furnishing & Thermal Insulation

**Performance Data**
- R-Value: As measured per the ADC test manual and ASTM C518
- Maximum Flow Spread: 25
- Maximum Smoke Developed: 2.0
- Temperature Range: 20°F to 180°F
- Maximum Velocity: 4,000 FPM maximum

**Material Features**
- Extra-heavy polyethylene jacket.
- Metalized jacket.

**This section includes insulated flexible ducts, round pipes, and rectangular ducts.**

### Half Section

#### Rectangular Ducts
- Main trunk lines for system supply.
- Snap-together – no tools needed.
- Notched corners for connecting sections, or use cleats.
- 2-ply-gauge (aluminum zinc) steel.

#### Round Metal Duct Pipes
- Snaplock design.
- Combined end with de-lap for easy interlocking fit.
- Galvanized steel construction.
- Cut to length with tin snips.

### Transitions & Connectors

**This section includes elbows, reducers, wyes, tees, and other accessories.**

#### 90-Degree Round Adjustable Elbows
- Used to make angular turns in runs of pipe.
- Adjustable to any angle through 90 degrees.

### Round Metal Duct Pipes (2 ft. & 3 ft. Sections)

### Mobile Home Insulated Flexible Ducts – R4.2 Black Jacket
- Extra-heavy polyethylene jacket.
- R4.2 Value.

### Insulated Flexible Ducts – R6 Silver Jacket
- Metalized jacket.
- R6.0 Value.

### Insulated Flexible Ducts – R8 Silver Jacket
- Metalized jacket.
- R8.0 Value.
## Transitions & Connectors

### Round Reducers/Increasers
- Used to reduce or increase diameter of pipe.
- Collar edges hemmed for added strength and safety.

### 45-Degree Wye Saddle
- Also called wye joints or reducing laterals.
- Used primarily for heating and air-conditioning applications for transition from one pipe to two pipes.

<table>
<thead>
<tr>
<th>Model #</th>

### In-Wall Duct Systems
This section includes rectangular stack (riser) and oval duct components.

### Half Section Rectangular Stack Ducts
- For use between wall studs for venting: kitchen & bath fans, range hoods, heating & air-conditioning supply, and return ducts.
- Snap together — no tools needed.
- Can be cut with tin snips.
- SOLD IN HALF SECTIONS

In-Wall Duct Systems

Stack Boot – 90-Degree
• For right-angle transition from round pipe or insulated flexible duct to rectangular stack duct.

Rectangular Stack Duct Cap
• Used to terminate or block-off a run of rectangular stack duct.

Rectangular Stack Duct Starting Collar
• For transition from planum or flat surface to stack duct.

Fan Boot
• For transition from range hood top 3 1/2” x 10” opening to round pipe.
• Crimped collar.

Oval Pipe
• For use between walls for supplying air to highwall registers or other floors.
• Efficient alternative to rectangular stack (riser) duct.

90-Degree Oval Vertical Elbow
• For changing the vertical direction of a run of oval pipe.

90-Degree Oval Flat Elbow
• For changing the horizontal direction of a run of oval pipe.

Oval Stack Heads with Wings
• Provides rightangle transition from oval pipe to side wall register.
• Built-in wings for easy attachment to wall studs.

Oval-to-Round Boot
• Provides straight transition from round pipe or insulated flexible duct to oval pipe.

Oval-to-Round Boot – 90-Degree
• Provides right-angle transition from round pipe or insulated flexible duct to oval pipe.

90-Degree Oval Vertical Elbow
• For changing the vertical direction of a run of oval pipe.

Oval-to-Round Boot – End
• For transition from round pipe or insulated flexible duct to oval pipe.

### Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### GreenBoots™
- Presealed and Preinsulated R6 Register Boxes.
- Installation rails included.
- For transition from round pipe or insulated flexible duct to air register or grill.

### Cold Air Frame
- Used in a heating & air conditioning system to provide the transition from the wall duct chase to a wall grille.

---

### Insulated Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.
- Insulated – no need to wrap. Insulation serves as noise deadener and helps control condensation.

### Register Box Saddles
- Horizontal transition from round pipe to air register or grill.
- Can be cut down if necessary.

### Duct Board Insulated Register Boxes – R6
- For transition from round pipe or insulated flexible duct to air register or grill.
- R-6.0 Duct Board Insulation.
- Preinsulated – no need to wrap.
- Insulation serves as noise deadener and helps control condensation.

### Snap-On Rail
- Easy method to attach flanged register boxes to joists or other nailing surfaces.

---

### Universal (Straight) Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### 90-Degree Register Boxes
- For right-angle transition from round pipe or insulated flexible duct to air register or grill.

### End Register Boxes
- For right-angle center-end transition from round pipe or insulated flexible duct to air register or grill.

### Insulated Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

---

### Register Boxes
This section includes all styles and configurations of register boxes.

### Insulated Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### GreenBoots™
- Presealed and Preinsulated R6 Register Boxes.
- Installation rails included.
- For transition from round pipe or insulated flexible duct to air register or grill.

---

### Cold Air Frame
- Used in a heating & air conditioning system to provide the transition from the wall duct chase to a wall grille.

---

### End Register Boxes
- For right-angle center-end transition from round pipe or insulated flexible duct to air register or grill.

### Insulated Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### 90-Degree Register Boxes
- For right-angle transition from round pipe or insulated flexible duct to air register or grill.

### Universal (Straight) Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

---

### Insulated Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### GreenBoots™
- Presealed and Preinsulated R6 Register Boxes.
- Installation rails included.
- For transition from round pipe or insulated flexible duct to air register or grill.

### Cold Air Frame
- Used in a heating & air conditioning system to provide the transition from the wall duct chase to a wall grille.

---

### Insulated Ceiling Register Boxes
- For transition from round pipe or insulated flexible duct to air register or grill.

### GreenBoots™
- Presealed and Preinsulated R6 Register Boxes.
- Installation rails included.
- For transition from round pipe or insulated flexible duct to air register or grill.

### Cold Air Frame
- Used in a heating & air conditioning system to provide the transition from the wall duct chase to a wall grille.
Universal Register Boxes with Flange
- For transition from round pipe or insulated flexible duct to air register or grill
- Bulb flange to provide area for register screws, sheet rock frame, nailing area for joists, and ability to install box before drywalling.

Rooftop Venting
This section includes all products installed on or above the roof.

Rooftop Jacks with Vent Caps
- Used to receive and cover venting duct pipe from kitchen & bath fans, and for attic ventilation.
- Bulb roof flashing – press-sealed design for maximum leak protection.
- Made for 4 1/2 roof pitch.
- Adapts to pitches from 3:12 to 5:12.
- Includes cap for rain, snow, and debris protection.
- 26RJVC Models – 26-gauge.

Rooftop Jacks with Wagon Caps
- Used to receive and cover venting duct pipe from kitchen & bath fans, and for attic ventilation.
- Bulb roof flashing – press-sealed design for maximum leak protection.
- Made for 4 1/2 roof pitch.
- Adapts to pitches from 3:12 to 5:12.
- Includes cap for rain, snow, and debris protection.
- 26-gauge.

Goose Neck Vents
- Galvanized.
- Heavy-duty screen for small animal protection.
- Works well on all pitched roofs.
- Ampule flashing for leak protection.
- 26-gauge.

Goose Neck Vents in Aluminum
- Aluminum.
- Heavy-duty screen for small animal protection.
- Great for appliance venting.
- Includes damper.
- 28-gauge.

Register Boxes
- Made for 4:12 roof pitch.
- Adapts to pitches from 3:12 to 5:12.
- Made for 4:12 roof pitch.
- Used to receive and cover venting.
- 26RJVC Models – 26-gauge.
- RJVC Models – 28-gauge.
- Includes cap for rain, snow, and debris protection.
- Ample flashing for leak protection.
- Works well on all pitched roofs.
- Heavy-duty screen for small animal protection.
- Great for appliance venting.
- Includes damper.
- 28-gauge.

Adjustable Versa Caps
- Recommended for live, hot stack, or B-vent installations.
- Non-clogging positive draft design.
- Clamp fittings adjustable for all standard sizes.
- Aluminum construction.

Rooftop Flashings with Tapered Stacks
- Used as boot flashings around pipes extending through roof.
- Tapered stack adapts to roof pitches from 3:12 to 5:12.
- Bulb roof flashing – press-sealed design for maximum leak protection.
- 28-gauge.

Goose Neck Vents in Aluminum
- Made for 4:12 roof pitch.
- Adapts to pitches from 3:12 to 5:12.
- Made for 4:12 roof pitch.
- Used to receive and cover venting.
- 26RJVC Models – 26-gauge.
- RJVC Models – 28-gauge.
- Includes cap for rain, snow, and debris protection.
- Ample flashing for leak protection.
- Works well on all pitched roofs.
- Heavy-duty screen for small animal protection.
- Great for appliance venting.
- Includes damper.
- 28-gauge.

Goose Neck Vents
- Galvanized.
- Heavy-duty screen for small animal protection.
- Works well on all pitched roofs.
- Ampule flashing for leak protection.
- 26-gauge.

Goose Neck Vents in Black
- Galvanized – Black.
- Heavy-duty screen for small animal protection.
- Great for appliance venting.
- Includes damper.
- 28-gauge.

Versa Caps
- Made for 4:12 roof pitch.
- Adapts to pitches from 3:12 to 5:12.
- Includes cap for rain, snow, and debris protection.
- 26-gauge.
### Heavy Gauge Systems

#### Stove Pipes
- **Black Stove Pipe**
  - Used to reduce or increase round pipe from larger to smaller diameter.
  - Heavier 24-gauge for venting wood stoves.
- **Black Stove Pipe Elbow**
  - Adjustable to 90-degree angle.
  - Heavier 24-gauge for venting wood stoves.
- **Black Stove Pipe Round Tee**
  - Designed to fit round piping to extend a duct system.
  - Heavier 24-gauge for venting wood stoves.

#### Reducers
- **Used to reduce or increase round pipe from larger to smaller diameter.**
- **Crimp end for interlocking fit.**
- **Heavier 24-gauge for venting wood stoves.**

#### Wyes
- **Used to vent two appliances together where codes allow.**
- **Crimp branch pipe in the direction of airflow.**

### Storm Collars
- **For rain, snow, and debris protection.**
- **Adjustable for various pitches.**
- **28-gauge.**

### Lead Roof Flashings
- **Used as boot flashings around pipes extending through roof.**
- **Designed to adjust to most roof pitches.**
- **2.5 lb. flashing.**

### Round Metal Pipes
- **Crimp end with stop-bead for easy interlocking fit.**
- **Heavier gauge for venting of boilers, furnaces, and water heaters.**

### Adjustable Elbows
- **Adjustable to 90-degree angle.**
- **Crimp end for interlocking fit.**
- **Heavier gauge for venting of boilers, furnaces, and water heaters.**

### Tee
- **Used for venting bath and kitchen fans, and for heating and air conditioning applications.**
- **Use to reduce or modify multiple pipe-size connections.**

### This section includes heavy-duty 26-gauge and aluminum items.
### Black Stove Pipe Duct Cap
- Designed to cap round piping so that you can impose stoppage on your stove pipe.
- Removable design allows easy cleaning of a capped stove pipe.
- Heavier 26-gauge for venting wood stoves.

### Galvanized Steel Flat Sheets
- Make your own custom fittings.
- Can be cut to size for any application.
- 26-gauge galvanized steel.

### Round Wall Vents
- Used for outside side wall termination of kitchen and bath fans, range hoods, and microwave venting.
- Built-in gravity damper.
- Built-in screen (WV4 & WV6SD).
- Aluminum construction.

### Rectangular Wall Vent
- Used for outside sidewall termination of kitchen and bath fans, range hoods, and microwave venting.
- Spring-controlled damper with foam gasket for tighter seal and quiet operation.
- Aluminum construction.

### Round Wall Vent – Black
- Used for outside sidewall termination of kitchen and bath fans, range hoods, and microwave venting.
- Built-in gravity damper.
- Built-in screen.
- Black galvanized construction.

### Fresh Air Vents
- Used to intake air into a combustion system or where fresh air intake is needed.
- Built-in bird screen.
- Galvanized steel construction.

### Straps & Hangers
- Used to hang insulated flexible duct, round pipe, rectangular duct, or plumbing pipe, depending on need.
- Helps prevent sagging over long runs.

### Spice Collars
- Coupling used to connect two sections of insulated flexible duct.
- Crimped on both ends for an easy fit.

### Ceiling Collars
- Used as finishing piece where pipe passes through ceiling, wall, or floor.

### Round Duct Caps
- Used to terminate round pipe run.

### Rectangular Duct Caps
- Used to terminate rectangular duct run.
- 28-gauge galvanized steel.

### “S” & Drive Cleats
- For joining pieces of rectangular duct or rectangular stack duct.
- Galvanized steel construction.

**Miscellaneous Items**

**Dampers**
- For balancing and adjusting airflow in individual runs of round pipe.
- Spring-loaded hardware for easy mounting into existing round pipe.

**Butterfly Damper**
- Designed to vent a range hood or microwave via round exhaust duct.
- Splined gravity damper design.

**Bathroom Exhaust Eave Vent**
- Used to vent bathroom exhaust through the under- eaves.
- 4" length.
- White plastic construction – matches most under- eaves.
- Easy installation with router saw.

**R-6 Ductwork Insulation Sleeves & Wrap**
- Used to insulate round metal pipe or rectangular duct.
- Convenient sizes for smaller jobs.
- Easy installation for new and existing ductwork.

**Water-Based Duct Sealants/Mastics**
- Used to seal all ductwork seams.

**Hex Type Screws (100 Pack)**
- No. 8 x 1/2" piercing, slotted hex head.

**FlexRIGHT Flexible Duct Elbow**
- Forms 90°degree flexible duct elbow.
- Fits sizes 4" to 16" flexible duct.
- Easy installation for new and existing ductwork.

**Evaporative Cooler Dampers**
- Helps limit the loss of heat during winter months in evaporative coolers.
- Galvanized steel construction.

**Kits**
- Kit contains most of the ducting items needed in most standard wall types.

**Add-A-Vent Room Addition Duct Kit**
- Designed to fit most range hoods that will be vented outside through a wall.
- Extra long throat to hold most wall types.

**Rectangular Appliance Wall Exhaust Vent**
- Kit contains all of the ducting items needed in most standard installations for 7-in. range hood vents through the roof.

**Appliance Roof Exhaust Vent Kit**
- Kit contains all of the ducting items needed in most standard installations for 7-in. range hood vents through the roof.

**Add-A-Vent Room Addition Duct Kit Includes:**
- 12 lin. ft. of R-6 6-in. insulated flexible duct
- 1.6-in. starting collar
- 1 10-in. x 4-in. x 6-in. straight register boot
- Installation rails
- Boot clips
- 2 tie straps
- 3 yards of duct hanger
- 1 white 10-in. x 4-in. ceiling register grill

**Appliance Roof Exhaust Vent Kit Includes:**
- 1 7-in. heavy-duty, black-painted metal roof vent
- 1 7-in. button lock elbow
- 1 23-in. x 10-in. transition
- 70" of 7" diameter smooth round pipe
