ADDITIONAL HAZARD IDENTIFICATION INFORMATION:

PRIMARY ROUTE OF EXPOSURE: Skin contact, Eye contact

SIGNS & SYMPTOMS OF EXPOSURE

EYES: Potential for eye irritation.

SKIN: Potential for skin irritation.

INGESTION: Not expected to be ingested.

INHALATION: Potential for respiratory tract irritation.

ACUTE HEALTH HAZARDS: Excessive grinding or abrasion of this product may create airborne dust and fiber concentrations in excess of exposure limits.

Exposure to concentrations in excess of the exposure limits may cause severe respiratory irritation, skin irritation and/or eye irritation.

CHRONIC HEALTH HAZARDS:

Repeated and/or prolonged exposure to dust and fibers at concentrations in excess of exposure limits may result in respiratory damage, chronic skin irritation and/or eye injury.

CARCINOGENICITY:

The International Agency for Research on Cancer (IARC) and the National Toxicology Program (NTP) have determined that there is sufficient evidence in humans for the carcinogenicity of inhaled crystalline silica in the form of quartz or cristobalite. In addition, IARC has determined that there is sufficient evidence for the carcinogenicity of quartz and cristobalite in experimental animals. Among individuals with silicosis, lung cancer occurs more frequently in those who smoke.

Sulfuric acid contained in strong inorganic acids mists is classified as a group 1 carcinogen (carcinogenic to humans) by the International Agency for Research on Cancer (IARC).

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE:	No specific handling or storage requirements.
OTHER PRECAUTIONS:	None

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**ENGINEERING CONTROLS /
VENTILATION:**

Use of this product is not anticipated to require more than general room ventilation during normal conditions of use that are in accordance with the manufacturer's specified applications. However, use of this product in other applications not specified by the manufacturer could potentially generate airborne dust and fibers that may require additional mechanical exhaust to prevent employee overexposures. Excessive grinding or abrasion of this product may create airborne dust and fiber concentrations in excess of exposure limits. If employee exposures exceed the exposure limits, local exhaust ventilation or other mechanical ventilation systems may be required to reduce such exposures to concentrations below the exposure limits.

RESPIRATORY PROTECTION:

If employee exposures exceed applicable exposure limits, respiratory protection should be worn. Only NIOSH-approved respirators should be worn. Selection and use of specific respirators should meet applicable standards set by state and Federal OSHA standards for respiratory protection and for the specific substances and concentrations to which employees are exposed.

EYE PROTECTION:

Wear safety glasses with sideshields or safety goggles.

SKIN PROTECTION:

Wear sturdy work gloves and intact clothing with long sleeves and long pants.

OTHER PROTECTIVE EQUIPMENT:

Wear appropriate closed-toe shoes or boots.

WORK HYGIENIC PRACTICES:

Employees should avoid eating, drinking, chewing, smoking, taking medication and applying cosmetics in work areas where this product is being installed or removed. Employees should wash their hands and other exposed areas of skin after handling this product and before smoking or consuming anything. Employees should shower at the end of each work shift after installing or removing this product. Work clothing should be washed separately and the washing machine should be wiped out at the end of the washing cycle.
