

Master Flow[®] Attic Exhaust Vent

SSB960SC – Slant-Back Metal Roof Louver with Granule Coating

Description

The GAF Master Flow[®] SSB960 Roof Louver is available in four popular granule-coated colors. A unique finishing process allows shingle granules to be adhered directly to the vent, providing a more complementary look to the roof's shingles (vs. typical metal/plastic roof louvers).

- **Slant-Back Design for Optimum Performance...** Excellent protection against weather infiltration, especially in steeper slope applications
- **Tough Granulated Finish...** Resists peeling, chipping, UV degradation and granule loss

Colors & Basic Specifications
