

## GRT STAINLESS STEEL EDGING

GRT Stainless Steel Edging is a strong yet lightweight, bendable restraint that provides a great finished look for both modular systems and/or intensive and extensive layered green roof systems. Our “L shaped” design retains green roof planting materials and can be used as an edging detail for paver and tiles on rooftop walkways, making it a great alternative to structural curbing.

MATERIAL	Stainless Steel: 11, 16, 18, 20, or 24 gauge
DIMENSIONS	Various heights by 10' lengths with drainage holes and 3/8" turnback
FINISH	Stainless Steel
CHEMICAL ANALYSIS	ASTM A751/20 test results available upon request
CHARACTERISTICS	Melted and manufactured in the USA No weld repairs Free of mercury and radioactivity contamination
