

# **UNISIL QUICK SPEC**

METAL (UN-1)

**NOTE:** The following "Quick Spec" is an abbreviated specification and is not meant to replace the detailed specification. Complete 3-part CSI System Specifications are available at www.gaf.com.

## METHOD REQUIREMENTS

### Required:

- O Roof must be clean, dry and tight
- O Apply at 40°F (4°C) and rising with no rain, dew, fog or freezing temperatures in forecast for 8 hours
- O Adhesion test required
- O Power washing required
- O Rust should be removed with a wire brush prior to coating, and structural repairs should be made with like materials as needed.

#### **Recommendations:**

 Refer to Technical Data Sheet for product specific application and surface temperature restrictions.

#### **Installation Overview:**

1. Before coating is applied, an adhesion test is required to ensure an adhesion minimum of 2.0

- pounds per linear inch (PLI). Test patches should be applied with rates listed below.
- 2. Tighten/replace existing fasteners. Encapsulate with appropriate flashing material.
- 3. Power-wash substrate to remove contaminants that could negatively affect adhesion. Allow roof to completely dry.
- Install crickets to divert water and complete any other necessary sheet metal repairs.
- Treat all roof penetrations, drains, curbs, and scuppers. (Refer to Substrate Preparation section for requirements)
- 6. If horizontal seams have gaps larger then 1/8"when pressure is applied at the lower panel add additional stitch screws and treat with flashing grade only.
- 7. Overlap seams must be treated with flashing grade. All other seams may forgo treatment **IF** the seal/tape is intact on the seam or if they are double locked. (Refer to Seam Treatment Guide for requirements)
- 8. Apply coating per the chart below:

CLEAN / PRIME						
	Product	Rate (Gal/Sq)				
Cleaner	Cleaning Concentrate (diluted)	0.5 - 0.7				
Primer	Not required					

SEAMS & DETAILS									
Treatment Type	Product	Total (Gal/Sq)	Total (linear ft/ gal) <sup>+</sup>	DFT* (mils)					
3-Coursed Rates	Silicone Mastic and Fabric	2.50	75	45					
Flashing Grade Only Rates	Silicone Mastic	4.00	50	60					

Note: For other product options, please refer to our Seam Treatment Guide. <sup>2</sup>Flashing rates are based on a 6" (152 mm) width.

METAL									
	Coating		Total		Warranties/Guarantees Available				
Coverage Term	1st Coat (Gal/Sq)	2nd Coat (Gal/Sq)	3rd Coat (Gal/Sq)	Gal/Sq	DFT* (mils)	Emerald Pledge™	Diamond Pledge™		
10 Year	1.00	1.00		2.00	23	Yes	Yes		
15 Year	1.25	1.50		2.75	31	Yes	Yes		
20 Year	1.00	1.50	1.00	3.50	40	Yes	Yes		

<sup>\*</sup> Dry Film Thickness (DFT) is rounded to nearest mil, and is theoretical. Actual DFT will vary dependent on substrate profile, application technique and waste factor.

Note: DFT for 3-coursed rates includes 6 mils for the fabric.
