- Fall Protection Equipment
- Fire Extinguisher

DESCRIPTION: Tear Off Machine

This machine is used for tearing off roofing systems on low slope roofs.

- Operate equipment for its intended use only and in accordance with manufacturer's printed instructions.
- Prior to the use of equipment, thoroughly inspect for wear and damage. Perform maintenance as required by manufacturer.
- While operating equipment be aware of perimeters, openings and obstructions in the work area.
- When refueling, eliminate sources of ignition, shut engine off and clean up spills before restarting engine.
- Report hazardous conditions and/or equipment deficiencies to supervisor immediately.
- Do not perform any work or use tools or equipment while under the influence of drugs or other substances that impair or affect your judgment or ability.

1. All operators and crew members must wear personal protective equipment such as safety footwear, eye protection, and snug fit clothing while working near machine.
2. Be certain all guards, shields, and pins are securely locked in place before starting.
3. Machine must be operated from the walk behind position only.
4. Never allow people to ride on the machine.
5. Do not modify the machine.
6. Keep hands and feet away from moving parts.
7. Do not operate if neutral setting is out of adjustment.
8. Look behind while operating in reverse.
9. Maintain visibility at all times. Stop if visibility is obstructed.
10. Avoid puncturing deck. Avoid prying under deck surface.
11. Operate on low slope roofs only. Make certain roof deck will support the weight of the equipment and personnel before raising equipment to the roof.
