May I Coat My GAF Warranted Roof For Energy Savings?

Yes... GAF has several ENERGY STAR® rated products available to help you meet your energy savings goals. They are designed to be chemically and physically compatible with our APP and SBS roofing systems and carry some of the best limited warranties in the industry.

The GAF recommended products are:

- **TOPCOAT® MB Plus**
- **TOPCOAT® Surface Seal SB**
- **TOPCOAT® MATRIX™ 322 Elastomeric Roof Coating**

Application Recommendations:

Generally...

- The surface must be free of water, ice, snow and debris prior to application.
- Do not apply at temperatures below 42°F (5.5°C). Substrate temperatures must be below 140°F (60°C) when applying product.
- Allow new roofs to age for 90 days, clean existing roofs.
- The application rate will be approximately ½ -1 gallon per 100sq. ft. depending on the product.
- The application can be by brush, roller or airless sprayer.
- Drying Time (75°F, 50% RH) is approximately 24 hours.

Before Application:

After Application:

Will Using A Non-GAF Product Void My Warranty?

No... Using non-GAF products will not void your existing guarantee although GAF would not cover leaks or other damages resulting from the use of a non-GAF coating. In addition, GAF would not be responsible for the cost of removing and re-applying any non-GAF supplied coating to undertake a covered repair.

Where Can I Get More Information?

GAF Technical Services can assist you... with these and other questions you may have regarding your new roof installation. GAF Technical Services can be contacted at **800-ROOF-411** (800-766-3411). Also, the GAF website is a great resource for just about any question you may have or for additional information you may require. Please visit: www.gaf.com.
